Hilltop Empowerment Centre
Architectural Computers
September 2016

We finally managed to work our way through the bikes and most of the computers. Our new technicians, Godwill Mohobeleli and Enny Mohobeleli, successfully set up the Architectural Computers at the Hilltop Computer Technical Centre in readiness for use by technical computer trainees.

Some of the computers will later be transferred to the Dimbaza Business Centre where Sarah Acton, one of our South African volunteers, is training Entrepreneurs in Business Skills. Dimbaza Business Centre is planning to expand its services to include graphic design where some of these computers will be of great use.

Please convey our sincere thanks to the thoughtful individuals involved in the company that made such a practical and wonderful donation possible! We deeply appreciate all the effort that went into making this a reality.
